PETERSBURG. THE POSTMASTERSHIP SETTLED-COLONEL D. G. POTTS SAID TO BE THE MAN-A SATISFAC-TORY APPOINTMENT-DEATH OF A PETERS-BURG LADY ABROAD -THE DISTRICT GRANGE-DISEASE AMONG HORSES-CHURCH NOTES. (Correspondence of the Richmond Dispatch.)

MARCH 15, 1877. The question of who shall be our postmaster seems to be definitely settled by intelligence received from Washington this afternoon. About 1 o'clock Dr. E. H. Sman, of Dinwiddie county, who was an aspirant for the office, and whose petition was sent on to the President Tuesday night, received a telegram from Hon. J. Ambler Smith announcing that Colonel David G. Potts had been nominated for postmaster by the President. Previous information had been received that the appointment would be between Dr. Smith and Colonel Potts, whereupon the former withdrew his application and cast his influence in favor of the latter. A subsequent telegram from another and entirely trustworthy source (nominated ?) postmaster, and that the nomination was agreed upon in Cabinet meeting

where the influences were potent both with the President and the Postmaster-General. It is needless to say that the petition for his appointment was very generally signed by Conservatives, and that the announcement tion generally. Colonel Potts was for nearly thirty years treasurer of the Petersburg Railroad Company, in which capacity he served faithfully and efficiently. For many years also he was a member of the Common Council and a justice of the peace. He is one of the oldest members and officers of the First Baptist church, a staunch Conservative, and a citizen of unblemished character. He will make a good postmaster.

The sad intelligence was received to-day of the death last evening, in St. Paul, Minnesota, of Susan M., wife of Dr. D. W. The deceased was a daughter of the late Robert Egerton, of this city, and a sister of Mrs. Colonel William E. Cameron. The District Grange last night recommended Mr. Peter F. Cogbill for Grange

agent in this city. Mr. Cogbill has held the position for a year past. After the appointment of an executive committee for the ensuing year, and discussing several matters of interest to the order, the Grange adjourned. The disease known as "blind staggers

NEW YORK DRY GOODS MARKET. MARCH 13.—As compared with yesterday, there is a better feeling in the market, and we can add an nereused movement of goods, particularly with obbers. This latter action is not confined to New

York, as we learn from telegrams received from western and southern markets that the jobbing trade at those points are much better occupied, and that the trade shows improvement over any day for There has been a much better trade to-day than resterday, and Monday's figures are very much larger han was supposed. This is encouraging, and as such action is general in all markets it is fair to con-

clude that the improved action we note will con-tinue to increase, provided no improper action is precipitated by the bearish grumblings of "chronic croakers."

With the exception of the reduced prices in
"Lousdale and "Fruits" the cotton goods market is
exceedingly steady, with some new inquiry for three

to four yards brown goods, and the production of the leading styles of standard cottons closely sold Printing cloths having shown very little action quotations are unchanged, Fall River holding steady at 44c., cash to sixty days, according to delivery, while from Boston, to make a market price for weekly deliveries, we learn that a large printer has made offerings of small lots at 4%c., cash, but with-

Prints from agents' hands have not shown an ac tive market, though we find that small selections of choice work are in constant request. Let us look things full in the face and see how the market stands. We find it fully as slow as before the reduction from 8c., which shows that customers for prints and not concession in prices were wanted. The middle of March is here, and it is high time the small trade were at work, and some improvement is to be noticed March is here, and it is high time the small trade were at work, and some improvement is to be noticed from jobbing hands to-day. From Chicago, St. Louis, Nasnville, Cleveland, and other distributing markets we learn of increased activity. The production of prints is being lessened. Retailers cannot do without prints, and they must be had at the best price possible. Assure them that the present price will not be disturbed as soon as they get their supplies at home—we say, assure them of this fact—and the stocks with jobbers will soon find a market. With any further reduction in the price of prints, the printers would have to stop, as at the present price there is no proit of any moment, and if printprice there is no proit of any moment, and if print ers will be true to their interest prints will sell a well at 73c. as at any other price that can be named. That some jobbers who have so much at interest should be continually endeavoring to cause a break is a policy we do not understand, for while deranging the market to their individual loss in sales, they also understand down the distribution of the sales. also impair to a certain degree the financial abilit of every debtor who holds prints at the highes

Let some assurance be given that the present pric will be maintained throughout the season, and the market will immediately show an improved action. Be firm at 7%c. and it will come out all right, and everybody will make something; a different policy must be hurtful to all. The way is plain and clear the therital total. The way is plant and clear, but whether it will be chosen remains to be decided. The Richmond prints, on and after to-morrow (Wednesday), will be sold with the usual "guarante of thirty days," at which time the prices will vary as follows: Richmond fancies, grays and quakers, 7c.; ditto Germans and checks, 7ig.; ditto pinks, 8c. This settles it. This company have always been violently engosed to the "grayntee" system, and have lently opposed to the "guarantee" system, and have fought it inch by inch, until last autumn war was declared, the condition of the market favoring an at tack, which was partially successful. The battle was renewed at auction nearly two weeks ago, and was renewed at auction nearly two weeks ago, and was so unsatisfactory in every particular that it has been determined that the only way in which priots can be satisfactorily distributed to jobbers is with protection. So score another victory for the 8 against the 7, though it is abaudoning a principle for the sake of policy.

Worsted dress goods are in very good demand for found styles, such as brokleries and decided but figured styles, such as broideries and deelded pat-terns in solid colors. Melange and deelded cloths are also in good request, as well as gray serges and twills, while in cotton dress goods the movement is

quite satisfactory.

Woollen goods have not participated in any general action, and apart from special styles, which, through a wide demand for small selections, have reached fair sales, the market has shown little life.—
